## MIC (mathématiques et informatique)

Approches interdisciplinaires des processus oncogéniques et perspectives thérapeutiques : apports à l'oncologie des mathématiques et de l'informatique

**Objectifs :** L'objectif général de cet appel à projets est **de faire émerger, ou de valider en conditions expérimentales, de nouveaux concepts, modèles ou méthodes en mathématiques et sciences du numérique visant à générer des progrès scientifiques en oncologie** (compréhension des mécanismes biologiques de cancérogenèse, aide à l'établissement du diagnostic et analyse prédictive du pronostic, optimisation de la prise en charge et suivi thérapeutique, ...). Les projets doivent concerner le **développement et/ou la validation de méthodologie innovante avec des données issues de la cancérologie (données biologiques ou cliniques)**. Il ne s'agit pas d'appliquer une méthodologie déjà éprouvée en oncologie pour obtenir des résultats, ni de valider une méthodologie standard. Le financement de thèse de science (hors biologie/santé) est possible dans le cadre de cet appel. S'inscrivant dans la Stratégie Décennale de lutte contre les cancers 2021-2030, les projets doivent avoir pour ambition de produire un impact concret en cancérologie à court ou moyen terme (< 8 ans). Le financement de thèse de science (hors biologie/santé) est possible dans le cadre de cet appel.
